Lucknow Welcomes You

On behalf of the organising team, it gives us great pleasure to invite you to the 'MPAICON 2023', the 10th Annual conference of Molecular Pathology Association of India to be organised by Department of Hematology, Sanjay Gandhi Post Graduate Institute of Medical Sciences, (SGPGIMS) Lucknow, on 18th and 19th of February 2023.

Needless to say, in the current scenario of precision medicine, molecular diagnostics has become an essential tool for the patient management and monitoring of diseases. It is now not only limited to inherited genetic and malignant disorders, but is also being utilised on a day to day basis for infectious diseases, stem cell research, reproductive biology, pharmacogenomics etc. There is an unmet need to advance the molecular laboratories in all these areas to step-up and provide high quality patient care.

The conference will bring together professional from all walks of life to one common platform and focus on how advancement in molecular techniques has impacted the clinical practises. There will be ample opportunity to interact with leading scientists and experts in their respective fields.

We will have plenary sessions along with parallel sessions of different tracks. Learned speakers from leading Indian institutes as well as international speaker will grace the scientific session. Scientific experts from the industry partners will showcase their products. The conference will also showcase oral papers, poster presentations from researchers of various institutes across India. Another major highlight of this conference will be a pre-conference, one-day hands-on workshop dealing with both basic and advanced techniques of molecular testing

We hope you will join us in this symphony of molecular science and enjoy the rich 'Awadhi cuisine' of this 'city of Nawabs' during your stay.
